4C (Slippage in Scheduling IOC)

PURPOSE OF ACTION:

General Information

ACTION OFFICER (Incl. Ext.)

REFERENCES:

Memo from Director of Security dated 15 December 1981

RESOURCE PACKAGE & COSTS (If applicable):

THIS PAPER IS FOR YOUR:

COMPONENT/ OFFICER	INFORMATION/ COMMENT	CONCURRENCE	APPROVAL/ SIGNATURE	INITIALS	DATE
- A/DD/A	X				
DD/A	X				12/17
DD/ODP	X				18 Dec
D/ODP	X				18/31

DISCUSSION:

I just received this memo from C/SSC referencing 4C IOC slippage and the necessity to establish a new/firm 4C installation date.

25X1

On the surface, it appears IOC will not take place before July/August 1982 timeframe.

If you need additional information, please advise.

15 December 1981

MEMORANDUM FOR: Director of Security

VIA: Deputy Director of Security (P&M)

FROM:

Chief, Special Security Center

25X1

SUBJECT:

4C

(Slippage in Scheduled IOC)

1. This memorandum contains recommendations for your actions.

2. In late November, I was advised that there will be slippage in the scheduled Initial Operating Capability (IOC) for the Intelligence Community (IC) users of 4C.

3. As recently as 29 October, at a 4C Working Group meeting the IC users were assured that the 4C development was on schedule, and they were reminded of their responsibilities to be ready for IOC on 1 April 1982.

25X1

Unclassified when detached
from classified attachment

OS 1-2719

25X1

Non-CIA recordkeepers have stopped improvements in their existing automated systems because they are expecting an IOC of 4C by 1 April 1982. They have been contributing eagerly to the development of 4C specifications that will solve their existing problems. Any considerable delay could reduce enthusiasm which, in turn, could reduce the effectiveness of 4C. 25X1

d. The DDCI may fault us because the delay will be the result of decisions made within the DDA. In February 1981 Admiral Inman intervened personally to obtain restoration of FY 81 funds for 4C, and in June 1981 he assigned responsibility for implementation to the CIA Deputy Director for Administration and the CIA Director of Security. (see attachments)

6. At this moment the non-CIA participants in 4C have not been advised of slippage. If it is to occur they must be advised and they should be given a new target date so they can properly plan and schedule their resources. Of course, many benefits would be obtained if, somehow, we could meet the scheduled IOC of 1 April 1982.

7. It is recommended that you discuss this matter with the Directors of Data Processing, Logistics and Communication. The objective of the meeting should be the establishment of a realistic date for IOC. It is further recommended that following this meeting you advise the Deputy Director for Administration of the established date.

8. If you approve the recommended actions, I will forward copies of this memorandum to the appropriate Office directors, and make arrangements for the meeting. 25X1

MEMORANDUM FOR NATIONAL FOREIGN INTELLIGENCE BOARD

SUBJECT: Expiration of the DCI's Committee on Compartmentation (U)

1. Effective 24 June 1981, [redacted] is designated as Special Assistant to the DCI for Compartmentation and Chairman, Committee on Compartmentation (COCOMP) vice [redacted] reassigned. (U)

25X1

25X1

2. I have instructed [redacted] as follows: The Committee on Compartmentation, et al., are to be terminated by 31 July 1981. Work in progress under the aegis of the committee is to be completed if possible. That which cannot be completed by 31 July and that which is ongoing will be formally transferred to appropriate organizations:

25X1

-- Completion of the Central Access Registry (4C) as a service of common concern will be under the cognizance of the CIA Deputy Director for Administration and the CIA Director of Security.

-- Other facets of the COCOMP effort that require work beyond 31 July will be transferred to the relevant continuing DCI Committee(s).

-- Chairman, Security Committee, will assume responsibility for records of the discontinued organizations, which will be retired to the CIA Records Center. (C)

3. The expiration of COCOMP is a milestone in the continuing community effort to rationalize protection for, and effective use of, Sensitive Compartmented Information. The past three years or more have involved much work by a significant number of people throughout the community. Many views and interests have been expressed, weighed and compared. I believe that this effort has laid the groundwork for the further development of SCI policy and procedures which should endure for years to come. I extend my appreciation and thanks to all who participated in this endeavor. (U)

CONFIDENTIAL

Approved For Release 2005/07/12 : CIA-RDP84-00938R000200130002-6

19 FEB 1981

The Honorable Joseph P. Addabbo
Chairman, Subcommittee on Defense
Committee on Appropriations
House of Representatives
Washington, D. C. 20515

Dear Mr. Chairman:

During my testimony before your Committee on 29 January, you asked my opinion regarding the APEX Special Access Control System. In particular, you were concerned with that portion dealing with 4C (Community-wide Computer-assisted Compartmentation Control System). I responded that I was opposed to APEX as such, but that I had not been made aware of the current planned parameters for 4C. I have now been provided sufficient detail to answer your question. (C)

Sensitive Compartmented Information (SCI) access approvals are controlled and accounted for by the individual NFIB agencies, who have their own noncompatible record-keeping systems. Many contractors hold accesses from several agencies, which require multiple inquiries to ascertain their status. It is evident that security is not well served by the existing disparate systems and approaches. I have concluded that the 4C system is separable and would provide the Community with an effective SCI access control and accounting mechanism which would enhance security through improved responsiveness. To this end, I support the 4C concept and its implementation. I have reserved on whether 4C also needs to provide a Sensitive Compartmented Information Facility Register until I have been able to study that requirement in depth. (C)

In reviewing the financial aspects of this proposal, I find in the classified annex to the DoD Appropriations Bill for FY 81 (Report 96-1020) that the Senate Committee on Appropriations recommended approval [] for APEX but limited expenditures to [] during FY 81, pending additional data from the DCI. The

25X1

25X1

25X1

CONFIDENTIAL

House Committee agreed and subsequently imposed the [] limit for FY 81. The former DCI on 14 January 1981 provided your Committee with additional data as requested. I presume that has provided the detail you need to fully fund 4C in FY 1981. Please let me know if that presumption is not correct and you need further information prior to releasing the additional [] in order to implement this system. (C)

25X1

25X1

Sincerely,

/s/ B. R. Inman
